

Polypropylene Tanks

PP Tanks

Polypropylene tanks also commonly known as PP tanks are specially designed to store chemical liquids. We as manufacturer of PP tank fabricate them from best quality material to provide reliable and trusted tanks. These tanks are made with high precision to avoid any kind of leakage or harm to the person working with it. The tank we offer are light in weight and are easy to transport.

Pickling Tank

Pickling is the process of surface treatment of the metals to remove the impurities and rust from their surface. The metal is dipped in various kinds of strong acids to clean them. We offer wide assortment of pickling tanks that are made according to industrial standards and embed them with latest features. These tank make the pickling process fast and simple.

Acid Storage Tank

We manufacture a wide range of acid storage tanks that vary in shape and size. The main feature of these tanks is that they are made from best quality material to avoid any kind of damage or reaction with the material of tank. We use high quality raw material in [acid storage tank](#) to assure their quality to store highly corrosive chemicals and acids.

Flux Tank

Flux tanks are used to carry out the coating process on the substance. The flux solution consists of a uniform mixture of zinc chloride and ammonium chloride. Flux tank is used in industries for structure galvanizing, wire galvanizing and sheet galvanizing. These tanks are made from high strength FRP composite material designed using RITA software. The flux tank removes oxides and adds a layer of steel to prevent further oxidization.

FRP Chemical Storage Tank

The FRP chemical storage tank is made with high accuracy and precision to avoid any kind of leakage. We have highly skilled professionals who manage the manufacturing process of the tanks and check the quality of the final end product. These tanks are fabricated using high quality FRP material that make

the tanks strong and light in weight. The [FRP chemical storage tank](#) are made according to the industrial standards and even customized to suit the needs of the client.
